ARTEMIS AEROSPACE QUALITY POLICY

Artemis Aerospace's strategy is to grow our business by building long term relationships with our customers and suppliers. This is supported by a committed team of people and our modern stores facilities. We also manage risk throughout the supply chain.

We are committed to providing our customers with quality aircraft parts and services that meet aviation and other legal and regulatory requirements.

To achieve this Artemis Aerospace has fully implemented a Quality Management System that meets the requirements of ISO9001:2015 and FAA AC00-56B.

The processes are monitored by measurable objectives and the whole Quality Management System is periodically reviewed at the Management Review for continual improvements.

Jim Scott
Managing Director
Issue 9
